HaithemEduAI

Complete user guide

Catalogue & step-by-step tutorial for your school

Students · QR attendance · Payments · WhatsApp · Finances

Welcome

HaithemEduAI replaces notebooks, spreadsheets and manual reminders with a single tool for private schools, training centres, nurseries and tutoring.

This guide follows a school's real journey, from creating your space to tracking finances. Every chapter has real screenshots and short steps to follow.

Who it is for

- Director / owner: dashboard, finances, users.
- Administration office: enrolments, payments, reminders.
- Teachers: taking attendance from a phone.

Contents

1 Create your school and sign in

2 Set up your school

3 The dashboard

4 Create and publish a course

5 Import your Excel lists

6 Enrolment and public link

7 The student record

8 Sessions and roll call

9 QR-code attendance

10 Track attendance

11 Payments and receipts

12 Unpaid balances and WhatsApp reminders

13 Cash book and teacher pay

14 Profit and statistics

15 Parent space and certificates

16 Users, licence and data

Chapter 1

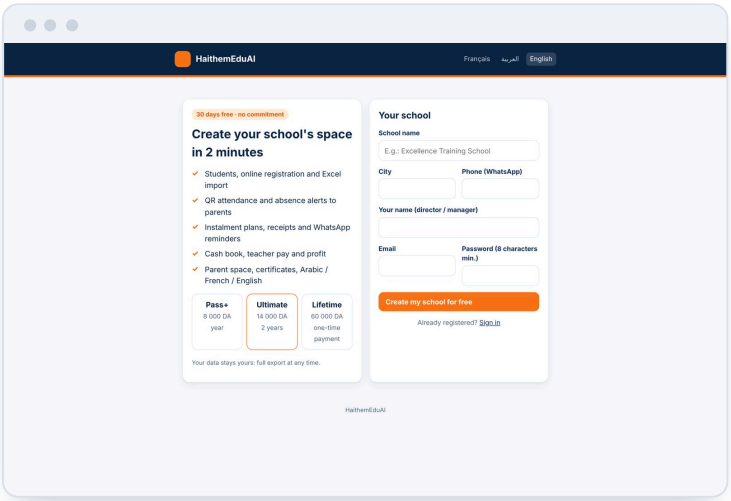

Create your school and sign in

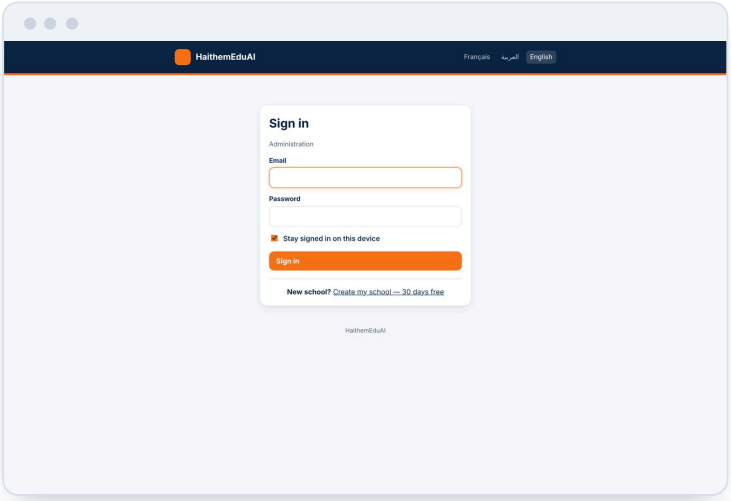

In under two minutes your school has its own space, separate from all others.

Step by step

1. Open the home page and click “Free trial”.
2. Enter the school name, your name, your email and a password (8 characters minimum).
3. Confirm: you are signed in and the 30-day trial starts.
4. On later visits, use the sign-in page with your email.

> **Tip** · Teachers and office staff get their own accounts from **Users**.

Chapter 2

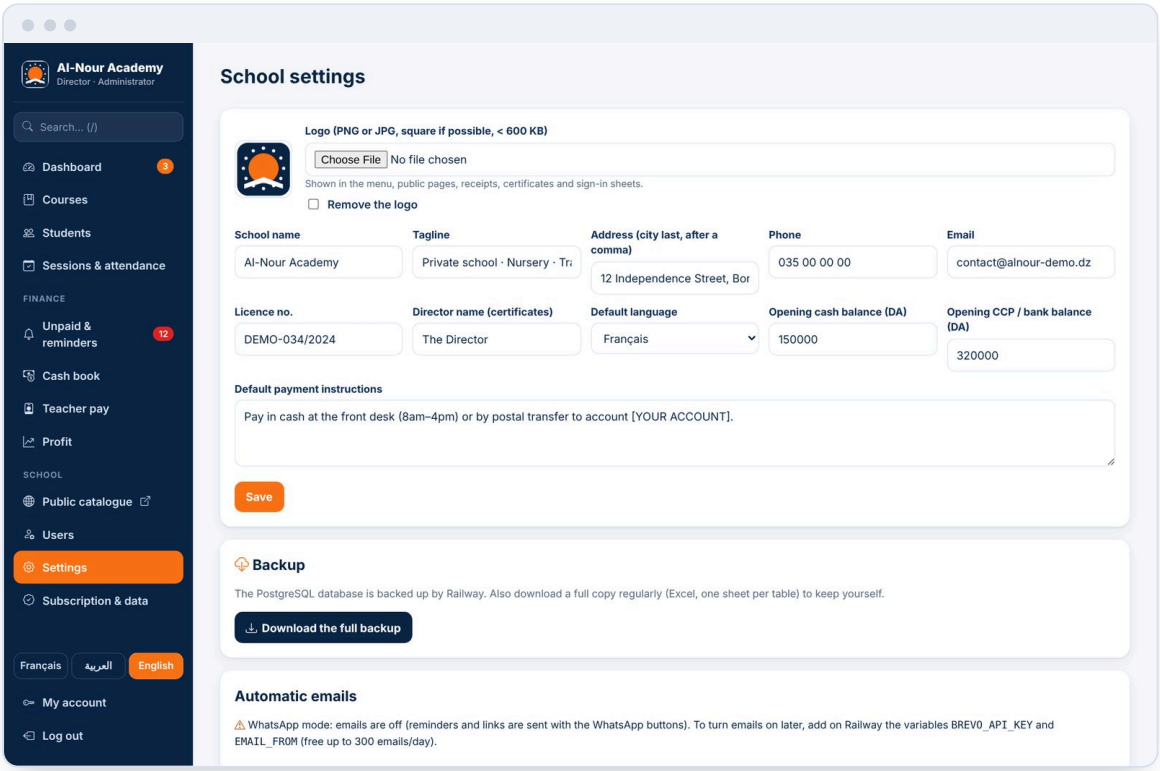

Set up your school

This information appears on receipts, certificates and WhatsApp messages.

Step by step

1. Open **Settings** in the menu.
2. Enter the name, city, phone and add your logo.
3. Choose the default language and currency.
4. Save: documents use this information straight away.

> **Tip** · Add a square logo for sharp printed receipts.

Chapter 3

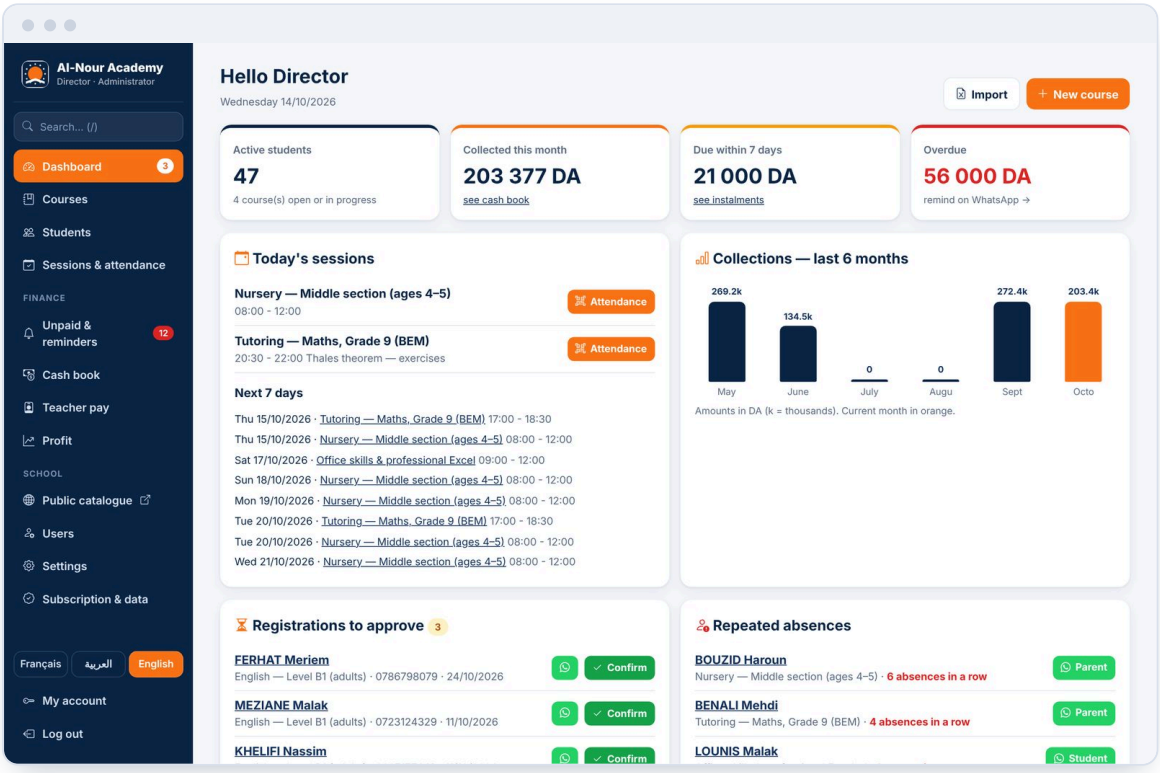

The dashboard

Your daily overview: the essentials of the school without opening several screens.

Step by step

1. The top tiles summarise active students, this month's collections, upcoming instalments and unpaid balances.
2. The chart shows collections for the last 6 months.
3. Today's sessions link straight to the roll call.
4. Pending enrolments and repeated absences flag what needs action.

> **Tip** · Click any tile to open the matching list.

Chapter 4

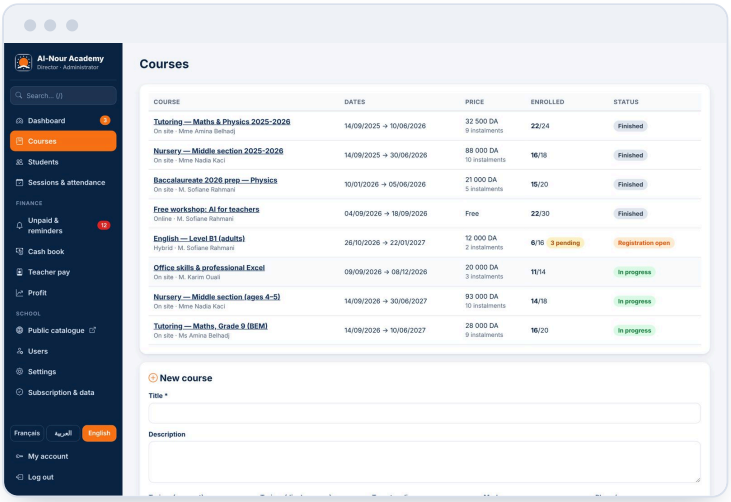

Create and publish a course

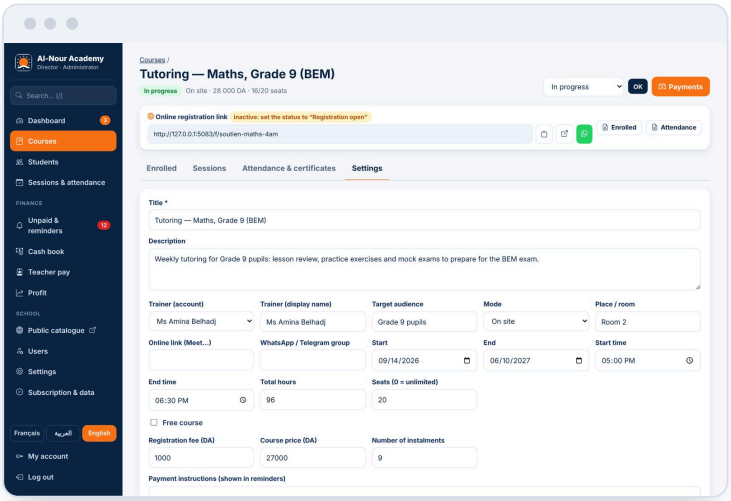

A course groups students, price, session schedule and teacher.

Step by step

1. Open **Courses** then “ **New course** ”.
2. Enter the title, description, dates, price and number of seats.
3. Add the programme, location and teacher in charge.
4. Turn on publishing: a public enrolment link is generated, ready to share on WhatsApp or Facebook.

> **Tip** · Finished courses stay available with their history.

Chapter 5

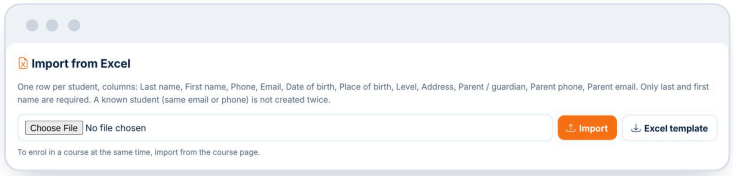

Import your Excel lists

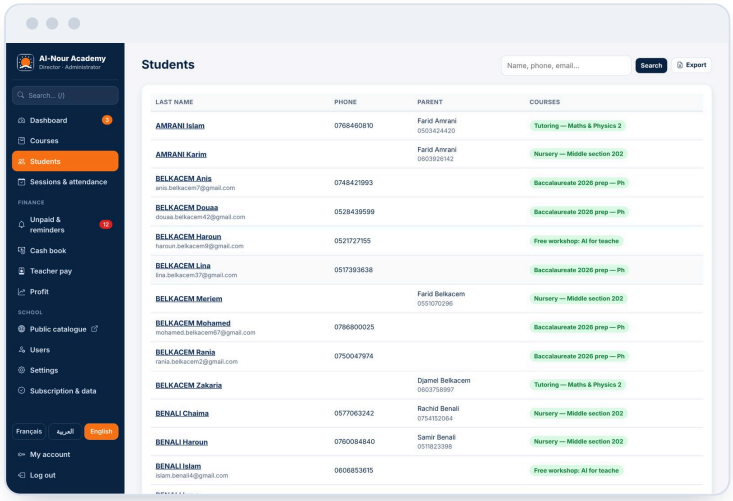

The fastest way to start when your students are already in a file.

Step by step

1. Open **Students** and go to the import area.
2. Choose your Excel or CSV file (name, phone, parent, group...).
3. Check the preview: duplicates and incomplete rows are flagged.
4. Confirm the import: records are created at once, ready to enrol.

> **Tip** · Keep a clear header row in your file; we can also import it for you.

Chapter 6

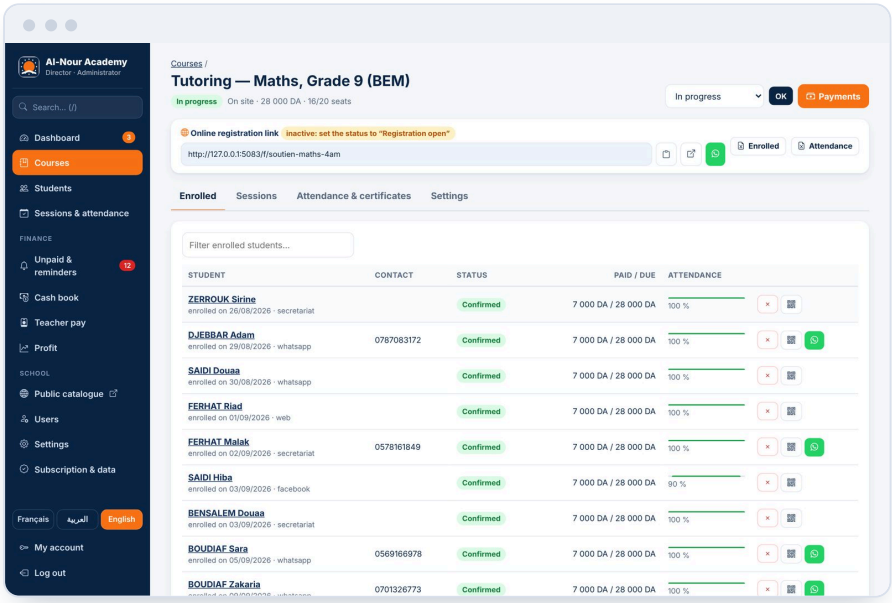

Enrolment and public link

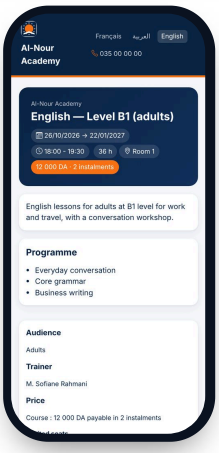

Families can enrol by themselves from their phone; you then approve.

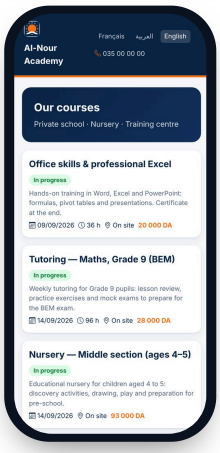

Step by step

1. Share the public catalogue link or a specific course link.
2. The parent fills in the form and receives a ticket with a QR code.
3. The request appears under “Pending enrolments” on the dashboard.
4. Approve: the student is enrolled and the payment plan is created.

> **Tip** · You can also enrol a student directly from the course page.

Chapter 7

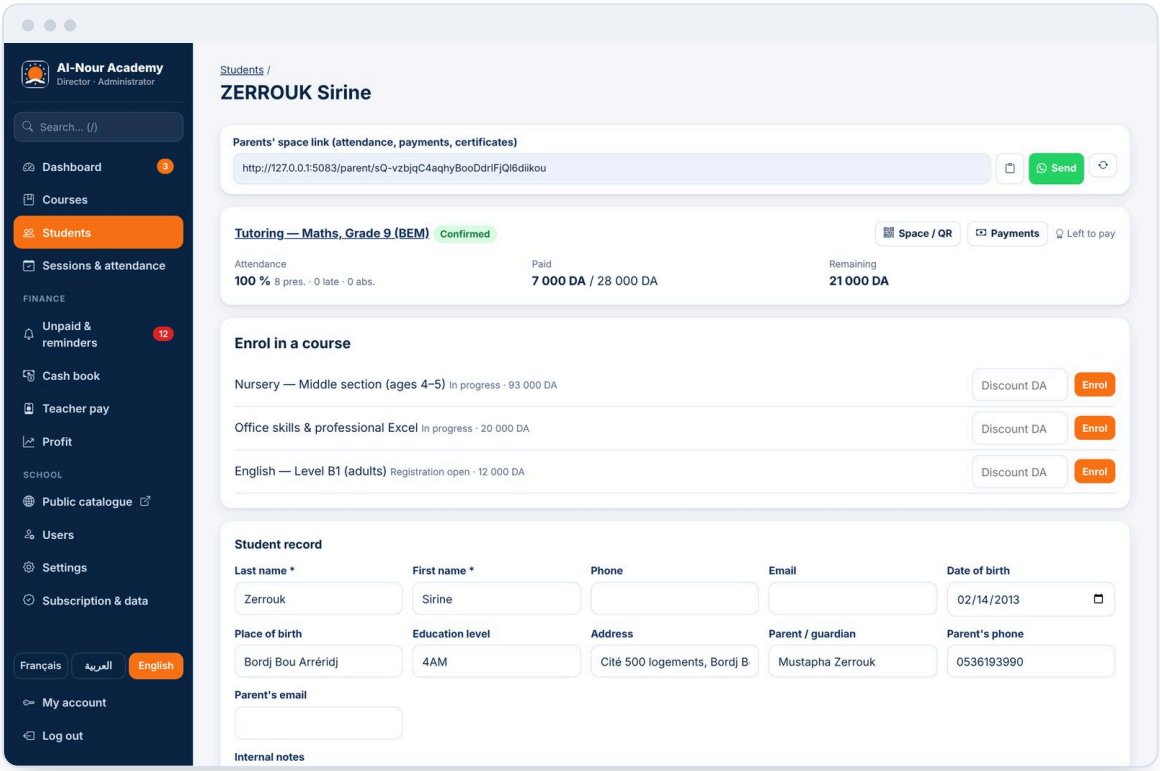

The student record

A student's whole history in one place: attendance, payments, contacts.

Step by step

1. Open **Students** and click a name, or use the search.
2. View contact details, courses followed and attendance.
3. Open the instalment plan to see what is paid and what is due.
4. Use the WhatsApp button to contact the family with a ready message.

> **Tip ·** The search bar accepts a name, a phone number or a receipt number.

Chapter 8

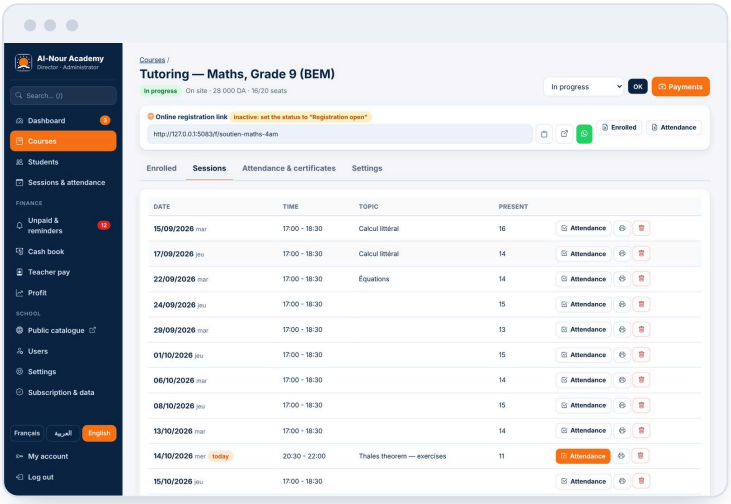

Sessions and roll call

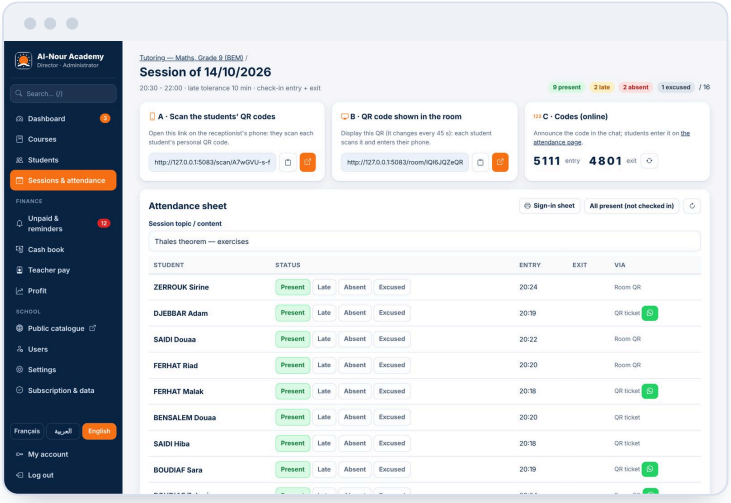

Each class has its session; the roll call takes seconds.

Step by step

1. Open **Sessions & attendance**: today's sessions are at the top.
2. Click the session to show the attendance sheet.
3. Mark each student: present, absent, late or excused.
4. Save: absentees can be reported to parents via WhatsApp.

> **Tip** · Teachers only see their own sessions.

Chapter 9

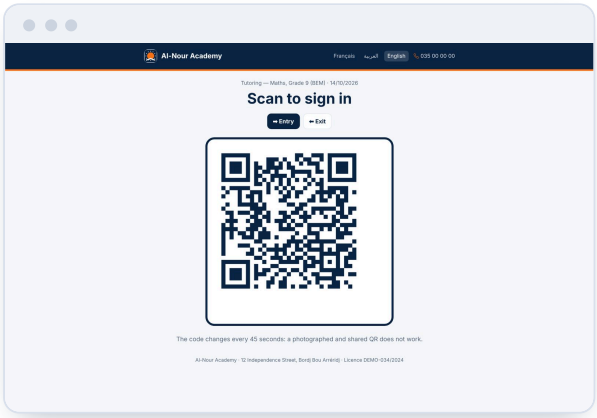

QR-code attendance

Three paper-free ways to check in, chosen by the teacher.

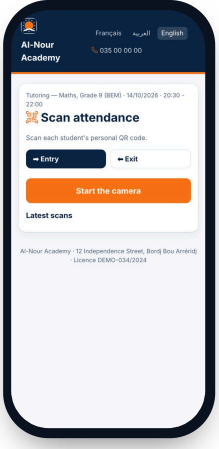

Step by step

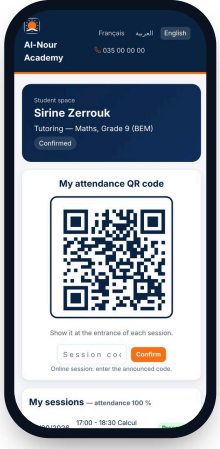

1. Classroom screen: display the session's QR code on a screen or projector.
2. Students scan the code with their phone and confirm their presence.
3. No QR? Students type the 4-digit code shown in class.
4. Need a paper trail? Print the session's sign-in sheet.

> **Tip** · Each student's personal QR ticket opens from their parent link.

Chapter 10

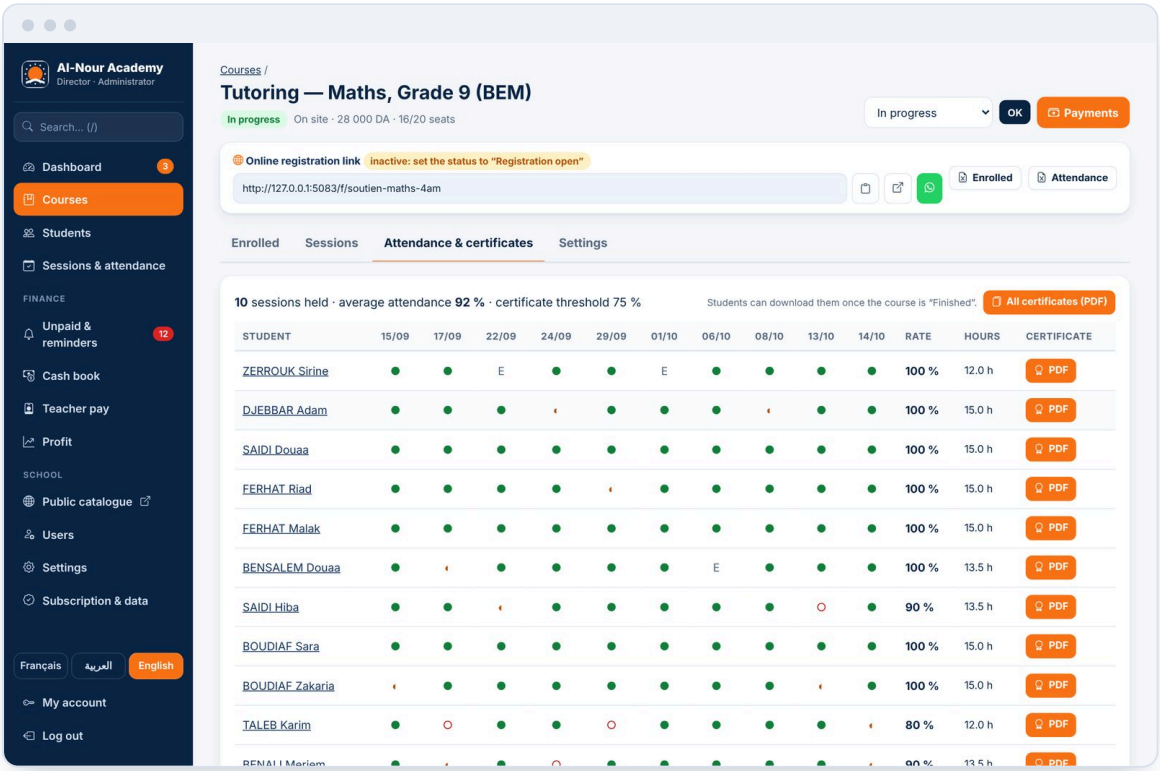

Track attendance

Spot struggling students early.

Step by step

1. Open the attendance tab of a course.
2. The grid crosses students and sessions with a colour code.
3. Attendance rates are computed automatically.
4. Contact the families of at-risk students straight from the row.

> **Tip** · Repeated absences also appear on the dashboard.

Chapter 11

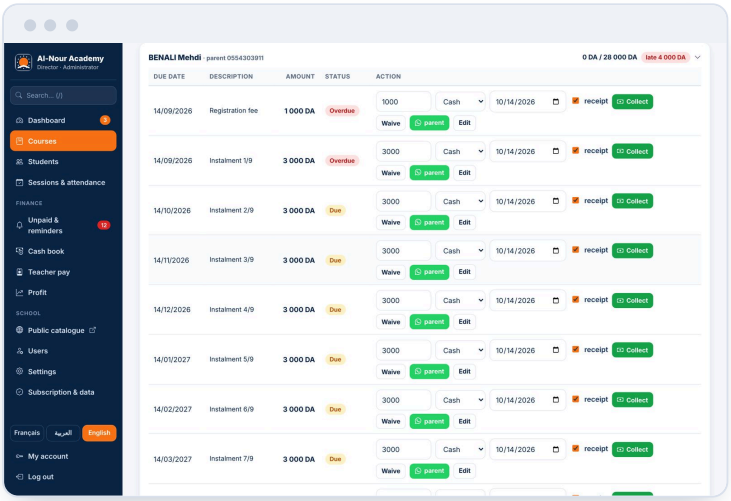

Payments and receipts

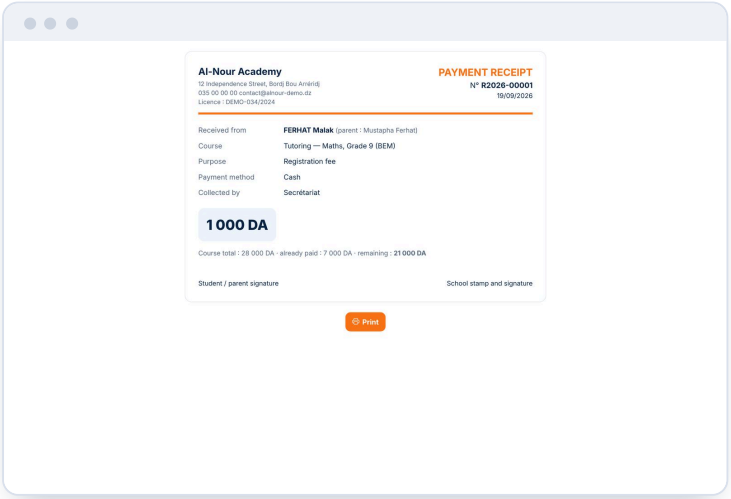

Every enrolment has its instalment plan; partial payments are handled.

Step by step

1. Open the course's payments page.
2. On the student's instalment row, click collect then choose the payment method.
3. Save: the balance updates immediately.
4. Print or send the PDF receipt, numbered automatically.

> **Tip** · The receipt carries your logo and details.

Chapter 12

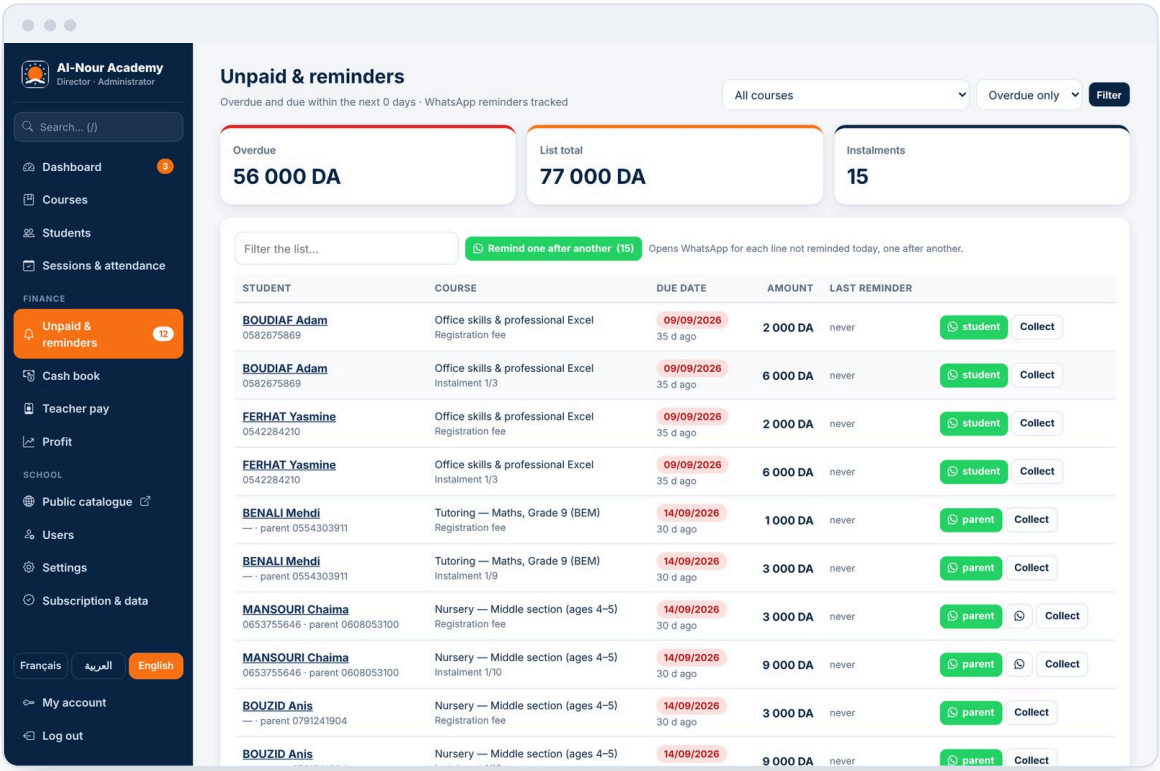

Unpaid balances and WhatsApp reminders

Never let late payments go unnoticed.

Step by step

1. Open **Unpaid & reminders**: late payments are sorted by age.
2. Filter by course or amount.
3. Click the WhatsApp button: the reminder message is ready with the exact amount.
4. Send it from your phone; the follow-up stays on the record.

> **Tip** · If email sending is configured, automatic reminders also go out by email.

Chapter 13

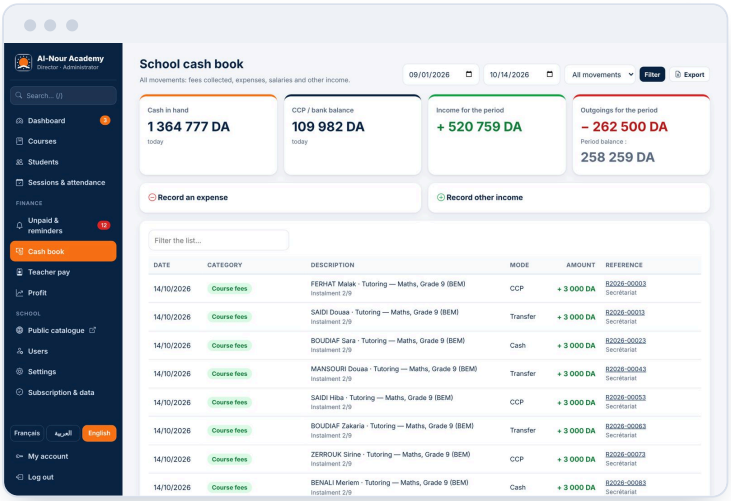

Cash book and teacher pay

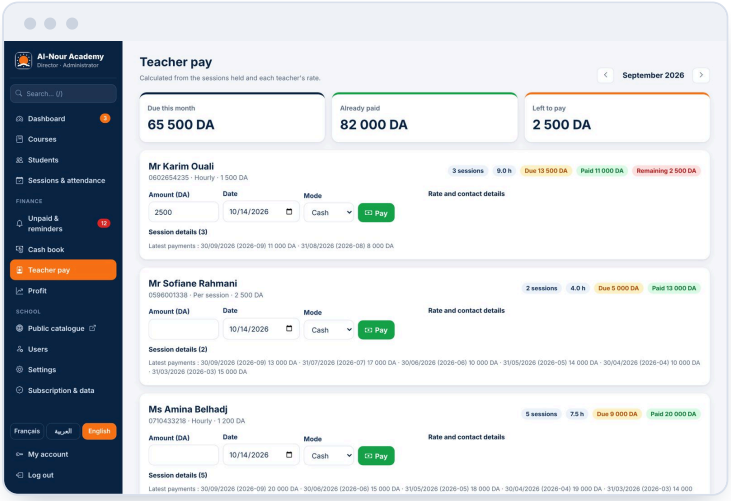

Every money in and out, salaries included.

Step by step

1. Open **Cash book** to see collections and add expenses (rent, supplies...).
2. Open **Teacher pay** to compute pay per hour, per session or per month.
3. Mark each payslip as paid.
4. Each entry is filed by category so it is easy to find.

> **Tip** · Administrators only.

Chapter 14

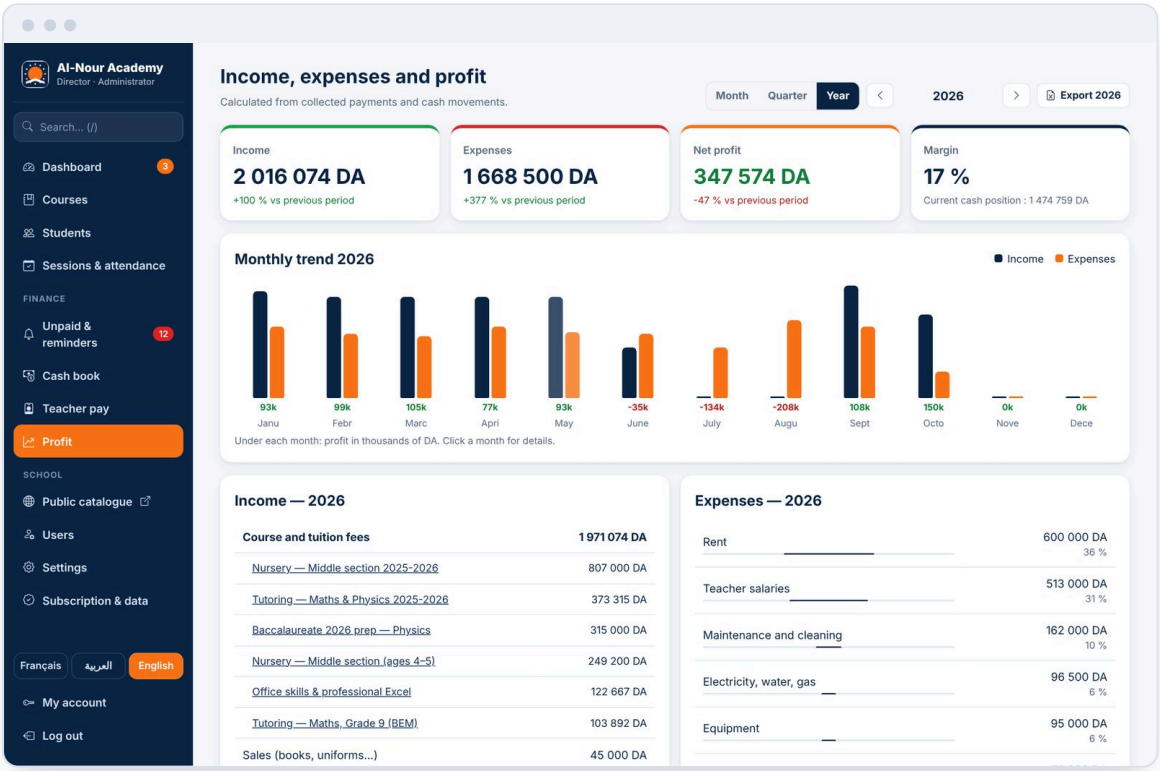

Profit and statistics

The school's real result, month by month.

Step by step

1. Open **Profit**.
2. See collections, expenses, salaries and net result.
3. Compare the chosen period with the previous one.
4. Change month or year to follow the trend.

> **Tip** · Enter all your expenses for a reliable result.

Chapter 15

Parent space and certificates

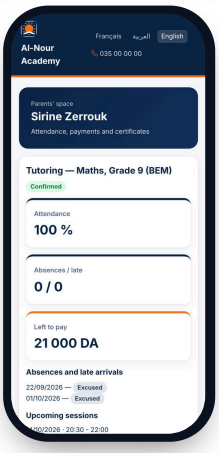

Families follow their child, and your certificates can be verified.

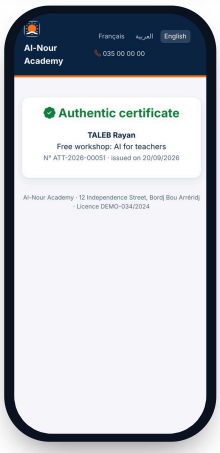

Step by step

1. Each student has a private parent link (no password) to send via WhatsApp.
2. The parent sees attendance, payments and the QR ticket.
3. At the end of a course, generate the PDF certificate from the enrolment.
4. The certificate's QR code opens a public verification page.

> **Tip** · Certificates can only be issued to students who meet your criteria.

Chapter 16

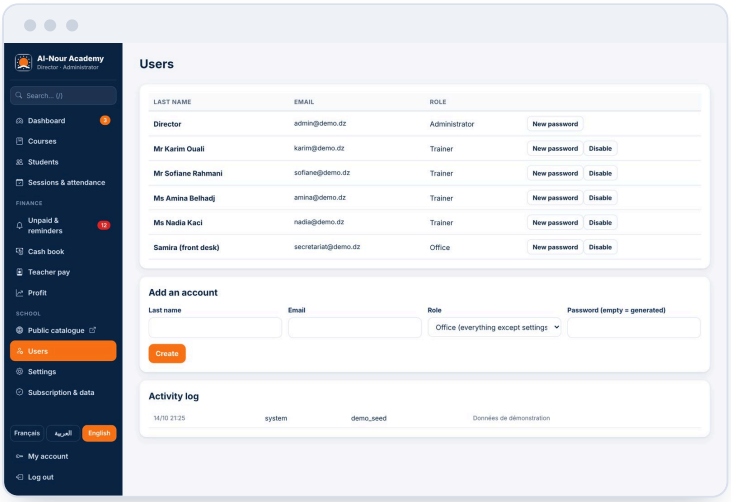

Users, licence and data

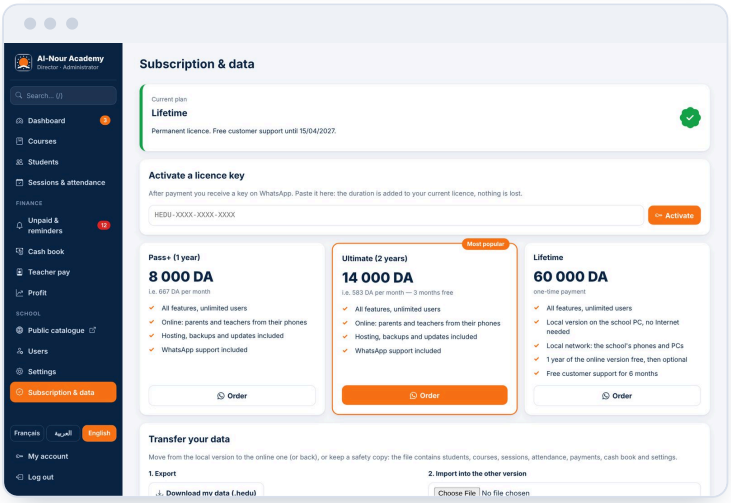

Manage team access, the licence and your backups.

Step by step

1. In **Users**, create accounts: administrator, office, teacher.
2. In **Subscription & data**, check the expiry date and enter your licence key.
3. Export a .hedu backup file regularly.
4. For the lifetime plan, install the local version on the school PC and connect other devices over Wi-Fi.

> **Tip** · An alert appears 15 days before the licence expires.

Frequently asked questions

What if a student forgets their QR?
The teacher types the 4-digit code shown in class, or ticks attendance manually.

Can I fix a payment entered by mistake?
Yes: the “undo” action puts the instalment back to due, and the amount can be edited.

How do I change the language?
The Français / العربية / English buttons are in the side menu; the choice is saved per user.

What happens when the licence expires?
The app becomes read-only: viewing and export remain possible until a new key is entered.

How do I back up my data?
Subscription & data → Export: a .hedu file containing the whole school, importable on another installation.
